

### ***Buckland Monochorum***

The path improvements in Buckland Monochorum, funded through Natural England's Paths for Communities scheme (P4C) were formally opened at the beginning of January. The scheme was the only P4C grant awarded in Devon as all funds were fully committed by the end of October. The improvements had support from a number of local organisations and a main improvement saw an 'easy access' route installed to avoid historic stone steps. The surface on a hitherto muddy path was also improved to allow increased access all year round.
