

Section 2

Contents

Section	Title	Page
1.	Foreword	1
	The Nottingham Declaration on Climate Change	3
2.	Contents	5
3.	Executive Summary	9
4.	Our Position Statement, Vision, Goal and Commitment	15
5.	Introduction	17
6.	Climate Change Science	19
	<i>What is climate change and why is it happening?</i>	
7.	Observed Climate Change	21
	<i>How has climate and sea level changed in the recent past?</i>	
8.	Climate Change Projections	33
	<i>How might climate change in the 21st century? When will it happen and how long will it last?</i>	
9.	Action on Climate Change	53
	<i>What action is being taken to tackle climate change?</i>	
10.	Climate Change Activity	57
	<i>What are we already doing?</i>	
11.	Climate Change Strategy	71
	<i>What do we need to do – what is our strategy?</i>	
12.	Climate Change Action Plan	83
	<i>What is our plan of action?</i>	

Appendices

N°.	Title	Page
1.	References and Bibliography	A1 - 1
2.	Abbreviations and Glossary of Terms	A2 - 1
3.	Our Communications Plan <i>What are our key messages and how will we communicate them?</i>	A3 - 1
4.	Our Mitigation Protocol <i>How will we reduce our greenhouse gas emissions?</i>	A4 - 1
5.	Our Adaptation Protocol <i>How will we adapt to the impacts of climate change?</i>	A5 - 1

List of Figures

N°.	Title	Page
1.	The Strategic Framework	12 & 81
2.	The Greenhouse Effect	19
3.	Variations of the Earth's surface temperature during the Instrumental Period	21
4.	Long term average annual temperature in Devon (1961 – 1990)	24
5a - d.	Global Warming in Devon (1900 – 2003) for Ilfracombe, Dartmoor, Exeter & Slapton	25 & 26
6.	Long term average annual precipitation in Devon (1961 – 1990)	27
7a - d.	Changes in Precipitation in Devon (1920 – 2000)	29 & 30
8.	... and for how long? Answer: Millennia	35
9a.	The baseline mean annual temperature (MAT) (°C) (1961 – 1990).	38
9b.	The change in MAT (°C) by the 2020s (high emissions scenario).	38
9c.	The change in MAT (°C) by the 2050s (high emissions scenario).	39
9d.	The change in MAT (°C) by the 2080s (high emissions scenario).	39
10a.	The baseline Mean summer temperature (MST) (°C) (1961 – 1990).	40
10b.	Change in MST (°C) by the 2020s for the high emissions scenario	40
10c.	Change in MST (°C) by the 2050s for the high emissions scenario	41
10d.	Change in MST (°C) by the 2080s for the high emissions scenario.	41
11a.	The baseline mean winter temperature (MWT) (°C) (1961 – 1990).	42
11b.	Change in MWT (°C) by the 2020s for the high emissions scenario.	42
11c.	Change in MWT (°C) by the 2050s for the high emissions scenario.	43
11d.	Change in MWT (°C) by the 2080s for the high emissions scenario.	43
12a.	The baseline mean annual precipitation (MAP) (mm) (1961 – 1990).	44
12b.	Percentage change in MAP by the 2020s (high emissions scenario).	44
12c.	Percentage change in MAP by the 2050s (high emissions scenario).	45
12d.	Percentage change in MAP by the 2080s (high emissions scenario).	45
13a.	The baseline mean summer precipitation (MSP) (mm) (1961 – 1990).	46
13b.	Percentage change in MSP by the 2020s (high emissions scenario).	46
13c.	Percentage change in MSP by the 2050s (high emissions scenario).	47
13d.	Percentage change in MSP by the 2080s (high emissions scenario).	47
14a.	The baseline mean winter precipitation (MWP) (mm) (1961 – 1990).	48
14b.	Percentage change in MWP by the 2020s (high emissions scenario).	48
14c.	Percentage change in MWP by the 2050s (high emissions scenario).	49
14d.	Percentage change in MWP by the 2080s (high emissions scenario).	49
15.	The five principles of sustainable development.	72
16.	The Strategic Space.	75
17.	Natural variability, mean climate and coping range.	A5 - 4
18.	Climate change schematic in a temporal context.	A5 - 4
19.	Climate impact assessment, reactive and anticipatory adaptation, and the forward planning/investment horizon	A5 - 6

List of Tables

N°.	Title	Page
1.	The composition of Devon's installed and target renewable energy capacity	61

List of Boxes

N°.	Title	Page
1.	Strategic Objectives (Communications)	12 & 76
2.	Strategic Objectives (Mitigation)	13 & 78
3.	Strategic Objectives (Adaptation)	13 & 80
4.	The Storyline Description for Emissions Scenarios	34
5.	Global Climate Projections to 2100	34
6.	UK Climate Change Scenarios for 2080s	36
7.	Climate Change in the South West by 2050s	37
8.	Climate Change in Devon	50
9.	Make a Climate Change for the Better	A3 - 3
