

Cullompton

Devon Town Baseline Profile

May 2006

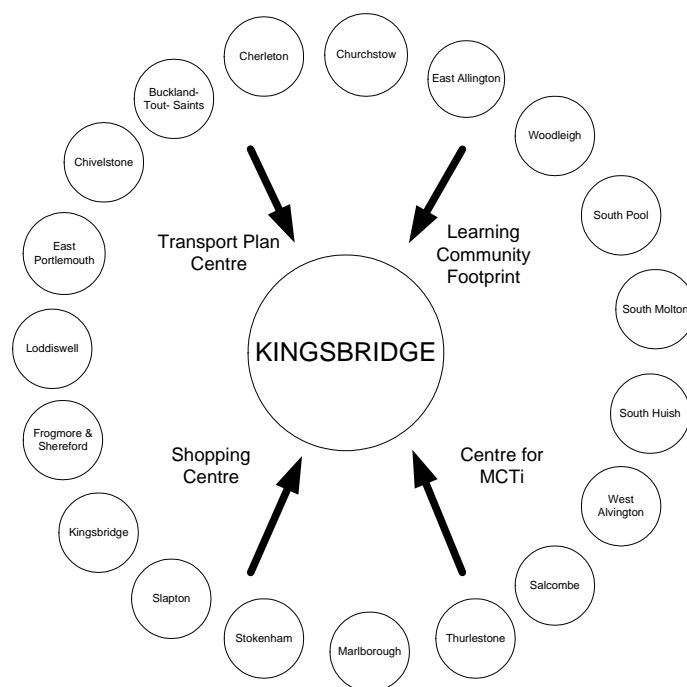

Identifying Devon Towns

The main factor that decides a town's hinterland is provision of services; the place that the hinterland looks to in order to provide the things it needs to survive. In order to identify the 28 Devon Towns, analysis of the following services and other relevant factors have been taken into account:

- Local Travel Plans – which are based on public consultation and map local travel patterns, the majority of which are short ones in and around local communities as part of people's daily lives.
- Shopping catchment areas – which are the service most frequently accessed by people.
- Learning Community catchment areas – which have a major influence on where people look to for services. Learning Community catchments do not always follow district or even county boundaries, but are based on a collection of feeder primary schools.
- Market and Coastal Towns Initiative areas - The Market and Coastal Towns Initiative was started after recognition that the health of a market town is vital to the well being of its hinterland, and that many of Devon's market towns were in need of regeneration. It is a Central Government initiative, administered by the RDAs. Over half of Devon is included in the Market and Coastal Towns Initiative.
- Parishes - The boundary definitions are shown in terms of parishes, as they are traditionally the smallest area used for 'clustering'.

The diagram below is an illustration of how this works for one Devon Town: Kingsbridge.

Exeter also provides a similar or related "market town" function as well as being a sub regional centre with a larger sphere of influence.

Foreword

In Devon, we want a county for everyone.

We want all to share in our economic prosperity, to have access to the best possible public services and to enjoy a good quality of life.

Our county is made up of many small and scattered communities built around larger market and coastal towns and the vibrant city of Exeter.

To make sure that the County Council and other agencies provide a good service to all these diverse communities and can meet their future needs, we need to fully understand and take into account the local situation and any local issues.

We call this initiative “Connecting with Communities” and it is a key part of our Strategic Plan for the future of Devon.

To help, we have produced a local profile of each of the key market and coastal towns in Devon and their surrounding area.

Based on key facts and figures, these profiles are just a starting point for local discussion about the real needs and priorities of each of our communities.

I hope you find this information useful and that it proves an invaluable resource in all future local planning.

Councillor Des Hannon
Executive Support Member for Improvement and Customer Service
Devon County Council

Introduction

This profile, one of 29 covering the area of Devon County Council, has been generated by the County Council's Corporate Information Service and is an important resource contribution to local community planning work.

Each profile provides a statistical overview, based on a series of facts and figures, of what life is like in each "Devon town" area. The profile contains a baseline of information and is intended to provide the basis for further discussion and development within the County Council and with partners.

In light of these discussions the profile can grow into a more rounded picture describing "how things are" for each area, as well as to set out the likely future actions that will be needed to redress any gaps in service or unmet needs.

The profile is structured around a series of themes to cover social, economic and environmental well being. This is a starting point in producing profiles about our "Devon town" areas in which considerable effort has been made to provide a comprehensive series of data. Further data will be added to subsequent editions as they become available to provide a more complete picture and monitor trends.

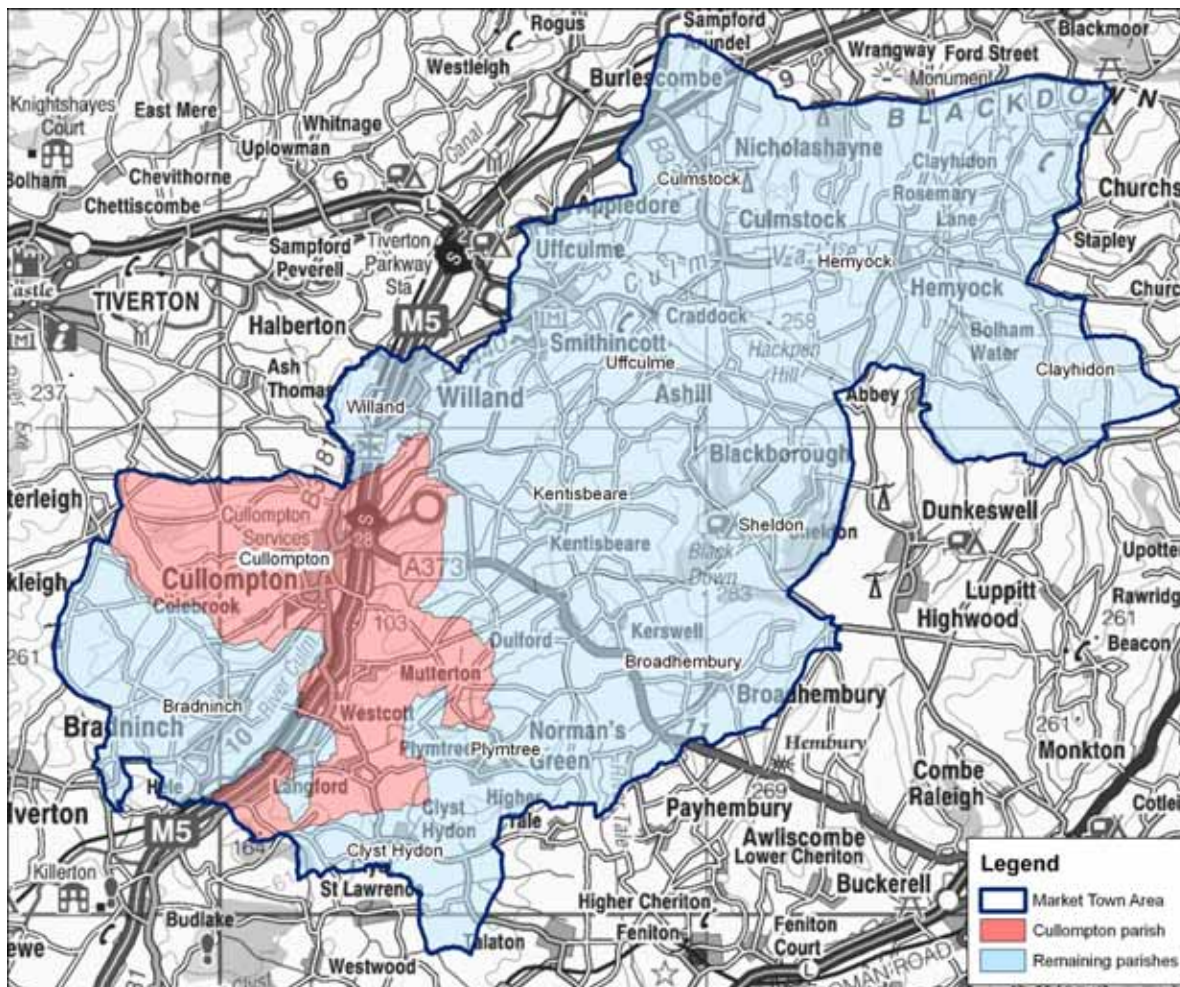

The profiles are available on the County Council website – www.devon.gov.uk/devontownprofiles

Area definition

Market town areas have been defined as aggregations of parishes. The following 12 parishes make up the Cullompton market town area:

Bradninch	Broadhembury	Clayhidon	Clyst Hydon	Cullompton
Culmstock	Hemyock	Kentisbeare	Plymtree	Sheldon
Uffculme	Willand			

Broadhembury, Clyst Hydon, Plymtree and Sheldon fall in East Devon District whilst the rest are in Mid Devon District.

Crown Copyright. All rights reserved. Devon County Council. 100019783 2006

As much of the data included in this profile is produced at a ward level, a ‘best-fit’ of wards is also used. Wards are included in one market town area if more than 60% of the population of that ward live within the market town boundary. If between 40% and 60% of a ward’s population falls within a market town area it will be included, but may also be included in another area.

The wards that comprise the market town area in this profile are as follows:

Bradninch	Cullompton North	Cullompton Outer	Cullompton South
Lower Culm	Tale Vale	Upper Culm	

Five wards fall completely inside the market town boundary. With over 90% of the population of Cullompton Outer ward and over 50% of Tale Vale ward living inside the boundary these wards are also included in the ‘best-fit’ for the purposes of this profile – Tale Vale also appears in the Honiton profile.

Each market town area is comprised of a centre (coloured red) and its surrounding hinterland (referred to as the “Remaining parishes” throughout this document). The centre for this profile is considered to be the parish of Cullompton, or the two wards of Cullompton North and Cullompton South if appropriate.

Some national datasets are released using a new geographic hierarchy – Super Output Areas. The lowest level – Lower Super Output Areas (or LSOAs) – is about one third the size of a ward. These are aggregated to form Middle Super Output Areas (MSOAs). Where data are only available at Super Output Area a best-fit approach

has been adopted. There are 15 LSOAs that fall either fully or partially inside the market town area, four of which form Cullompton parish. There are three MSOAs in the market town area, one of which forms Cullompton parish. A further two provide a best fit for the remaining parishes.

Additional information has been included to provide some comparisons. All tables have data for the Mid Devon and East Devon districts and the area administered by Devon County Council – where reference is made to the county of Devon this refers to the area covered by Devon County Council, which does not include Plymouth or Torbay. Where possible data are also included at a national level, either for England or England & Wales.

This profile makes use of data from the 1991 and 2001 Censuses. All such data is acknowledged as Crown Copyright.

Population

Summary

The structure of the population in the market town area is broadly similar to that across the district and the county. There is a slightly higher proportion of the younger working age (25-44) and 75 and the over in Cullompton parish. The surrounding hinterland has a slightly higher proportion of the older working age group (45-64).

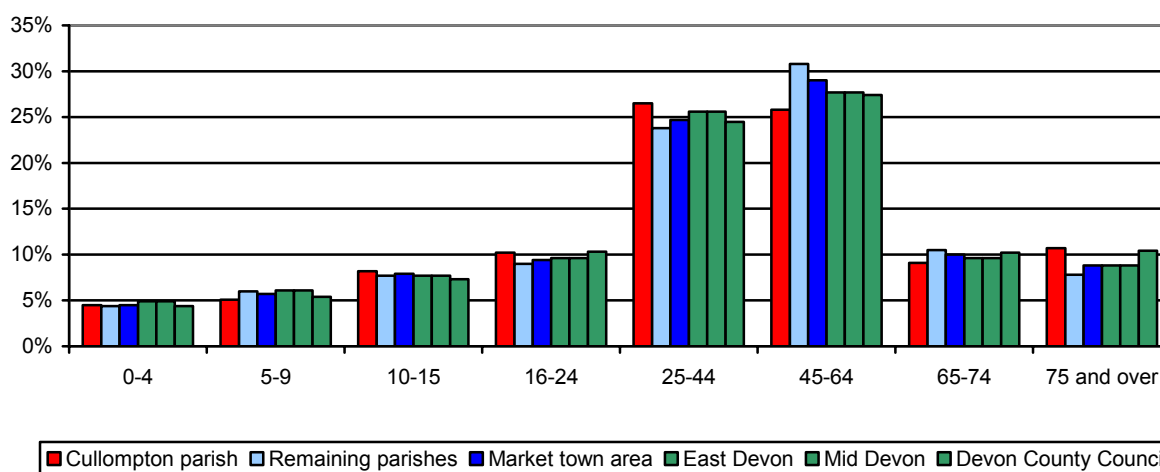

There has been significant population growth since 1991 in the area with Cullompton parish growing by about a third and more than twice the county average.

The proportion of people from minority ethnic groups in the market town area is consistent with the districts and county averages.

The level of households occupied by individuals in the market town area as a whole is slightly lower than the districts and county averages. The surrounding hinterland has a lower percentage than Cullompton parish.

Percentage of population by age band (2004)

Area	Total population	Age band							
		0-4	5-9	10-15	16-24	25-44	45-64	65-74	75 and over

Deprivation

Summary

No Lower Super Output Areas (LSOA) are ranked in the most deprived 25% nationally, with two LSOAs ranked in the next 25% most deprived, eleven are in the 50-75% and two in the least deprived quartile.

The principal source of deprivation data is currently The Indices of Deprivation 2004. This is a Lower Super Output Area (LSOA) level measure of multiple deprivation and is made up of seven domains. A LSOA is an area of about 1,500 people and has been devised to standardise statistical geography across the country. The seven domains are:

- Income Deprivation
- Employment Deprivation
- Health Deprivation and Disability
- Education, Skills and Training Deprivation
- Barriers to Housing and Services
- Living Environment Deprivation
- Crime

There are two supplementary Indices (Income Deprivation Affecting Children and Income Deprivation Affecting Older People).

The model which underpins the Index of Deprivation 2004 is based on the idea of distinct dimensions of deprivation which can be recognised and measured separately. These are experienced by individuals living in an area. Where possible, the indicators relate to 2001.

The information will help target policies and funding, reinforcing the Government's drive to improve the quality of life in disadvantaged communities.

There are over 32,000 LSOAs in the 2004 index, replacing the 8,500 wards used to construct the Index of Multiple Deprivation 2000. The LSOA boundaries were determined nationally with no local input.

The 2004 index was developed from academic research undertaken by Oxford University.

The table below compares the areas in Devon ranked in the most deprived 25% nationally, in terms of the number of wards in 2000 and the number of LSOAs in 2004, together with the population of these areas.

Comparison of IMD 2000 and ID 2004

Area	IMD 2000		ID 2004	
	Number of wards	Population	Number of LSOAs	Population
East Devon	1	3,901	0	0
Exeter	3	17,070	14	22,057
Mid Devon	0	0	1	1,652
North Devon	6	21,409	10	14,158
South Hams	1	5,458	0	0
Teignbridge	6	24,408	6	8,918
Torridge	10	22,217	3	5,731
West Devon	1	1,483	0	0
Devon County Council	28	95,946	34	52,516

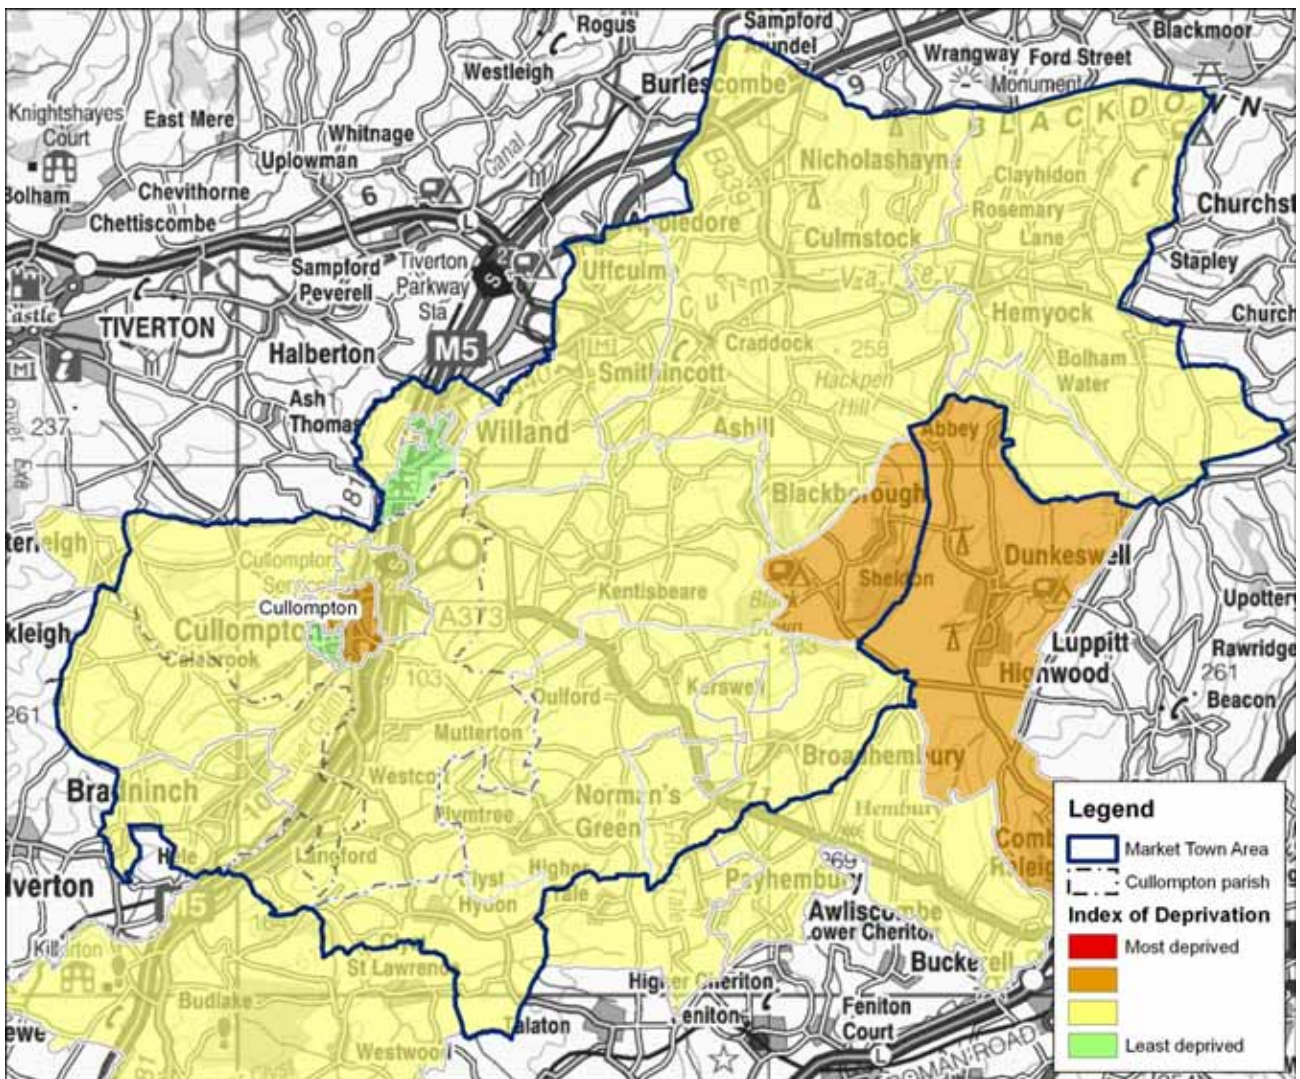

Source: Office of the Deputy Prime Minister and South Devon Health Informatics Service (FHSA data)

Application of the new index reduces the population in Devon perceived to be living in the most deprived areas by around 45%. This is probably due to the addition of crime and the living environment to the index, which in both cases the area covered by Devon County Council would have scored well compared to the national average. The reduced weighting given to the access to services domain may also be a contributing factor.

There are 15 LSOAs that fall either completely or partially within the area covered by this profile. None of these is classified as being in the most deprived 25% of LSOAs nationally. Two LSOAs fall into the next 25% - one of these are located in Cullompton. A further 11 LSOAs fall into the 50-75% most deprived areas (two of these are

in Cullompton) and the remaining two LSOAs are classified as being in the least deprived 25% of LSOAs nationally (one of these is in Cullompton).

The Local Economy

Summary

Unemployment levels in the Cullompton wards area are quite high compared to the districts averages and the same as the county figure.

Economic activity rates as a whole within the market town area are higher than the county and national averages and self-employment levels in the surrounding hinterland are higher than the county and national averages and may well reflect those involved in farming.

Claim rates for Income Support are slightly higher in Cullompton parish compared to the Mid Devon figure.

Claim rates for Job Seekers Allowance in the market town area are lower than the Mid Devon, county and national averages.

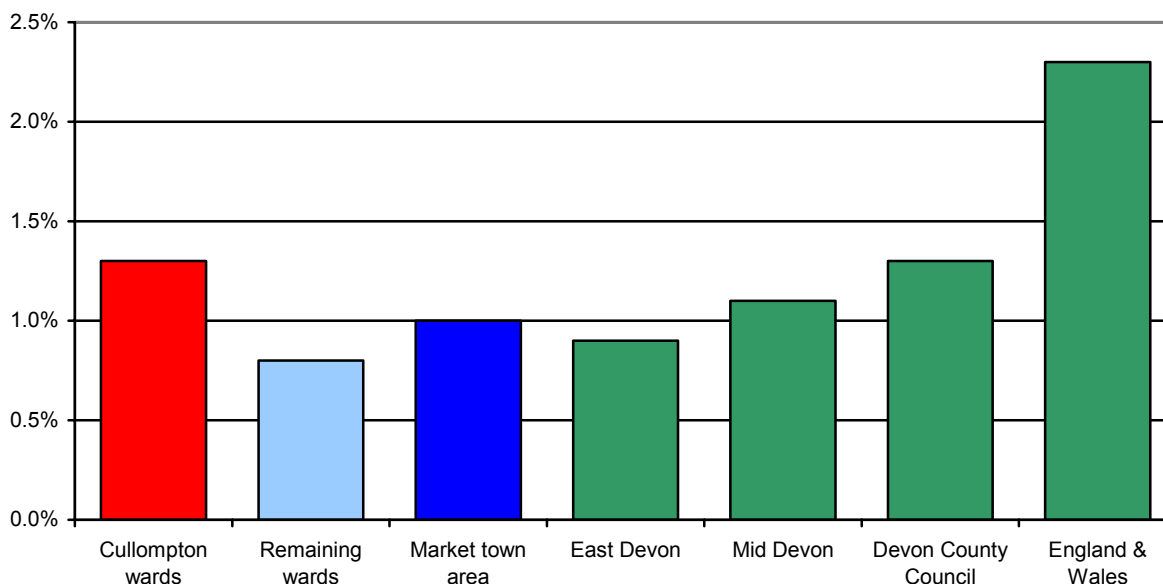

The number of households with an annual income of less than £20,000 is lower than the district and county averages.

The percentage of employment by industry sector of those living in the market town area highlights the main sectors of employment are wholesale & retail and manufacturing. This represents around 33% of employment in the market town area.

Over 40% of businesses in the market town area are involved in either manufacturing or wholesale & retail or real estate.

Unemployment as a proportion of working age resident population (April 2005)

Area	Number unemployed	% working age population
Cullompton wards	58	1.3%
Remaining wards	68	0.8%

Skills and Learning

Summary

Children living in areas other than Cullompton parish achieve significantly higher results at Key Stage 2 than those that live in the parish. English and Maths in the market town area are just above the national average but Science is a just below.

Achievement rates for GCSEs at grades A* to C were also better for children living outside of Cullompton parish but overall results are better than the county figure.

The overall level of qualification within the market town area is similar to the district and county averages. However, the proportion of people with no or level 1 qualifications are noticeably higher in Cullompton parish. Cullompton parish also has a smaller proportion of people with the highest level of qualification.

Health, Care and Wellbeing

Summary

Incapacity Benefit and Severe Disablement Allowance claim rates are about average.

Claim rates for Disability Living Allowance within the market town area are similar to the district and county averages.

The percentage of people living with a limiting long-term illness within the market town area is similar to the district and county averages. The same is true for the general health indicator.

The data below relating to Income Support and Job Seekers Allowance are based on a best fit of Middle Super Output Areas (MSOAs). There are three MSOAs in the market town area, one of which forms Cullompton parish. A further two provide a best fit for the remaining parishes.

Community Safety

Summary

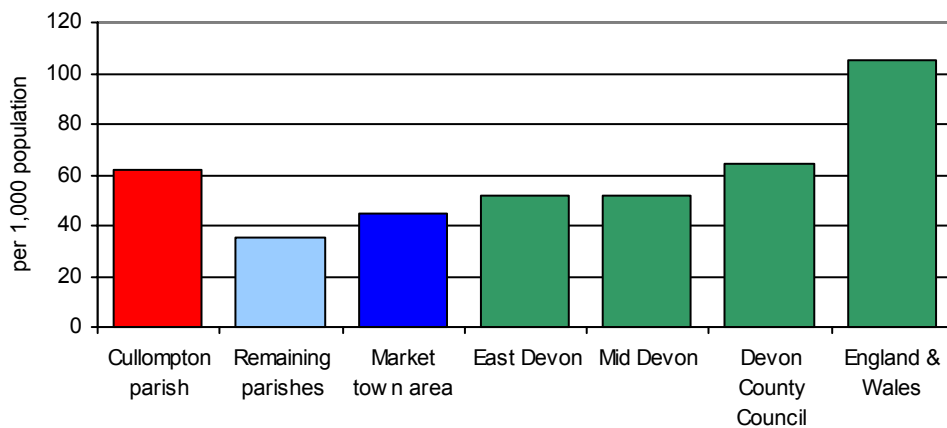

The rates of crime in all categories apart from vehicle crime are highest in Cullompton parish but generally below the county figure.

All crimes in the market town are below the national figure.

Data comprises addressable data only, and as such rates are based on approx 92% of all crime.

Total crime per 1,000 population (2004/05)

Housing

Summary

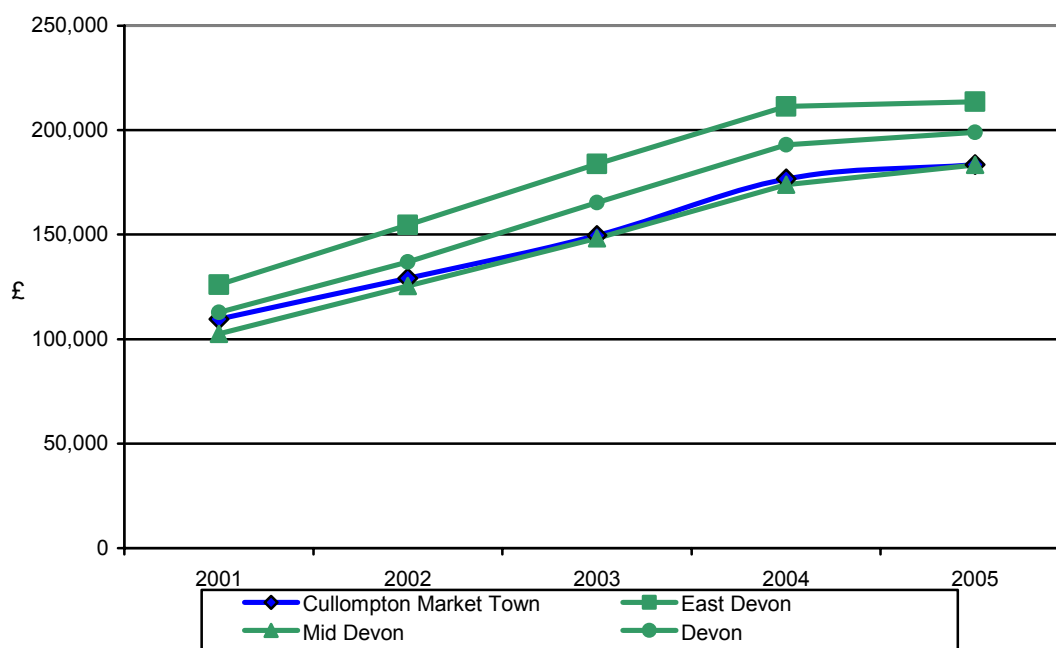

House prices in Cullompton parish are less than the rural area. The average house price in the market town area has increased by over 67% from 2001 to 2005. House prices in the market town area are consistently below the county price.

In 2004 average house prices within the market town area are lower than the county and national averages.

The dwellings by tenure figures closely match the county and national figures.

House price change (2001 to 2005)

Area	2001	2002	2003	2004	2005	% change 2001 - 2005
Cullompton parish	£105,419	£123,217	£136,509	£162,910	£149,559	41.9%

Transport

Summary

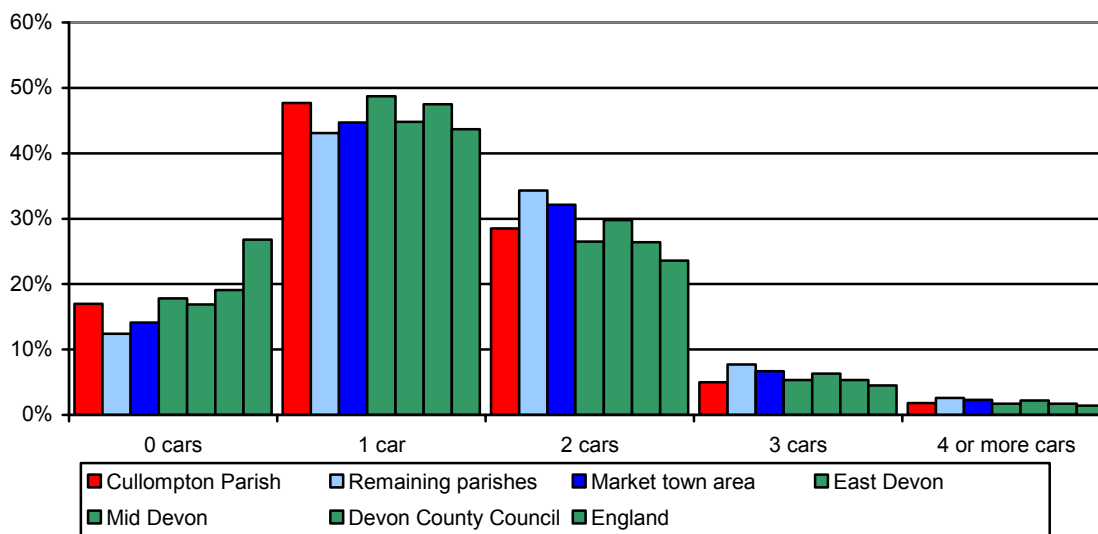

There are higher levels of car ownership outside Cullompton parish. 17% of Cullompton parish households do not have access to a car.

Around 15% of people living in the market town area work from home; this is higher in the remaining parishes and above all three comparators. Within Cullompton parish 15% of people travel to work either on foot or by bicycle, this is lower than the county average.

The percentage of households who can access an acute hospital within an hour and a GP and shops in 30 minutes using public transport is significantly lower outside Cullompton parish but not exceptionally good within the parish either.

Car ownership (2001)

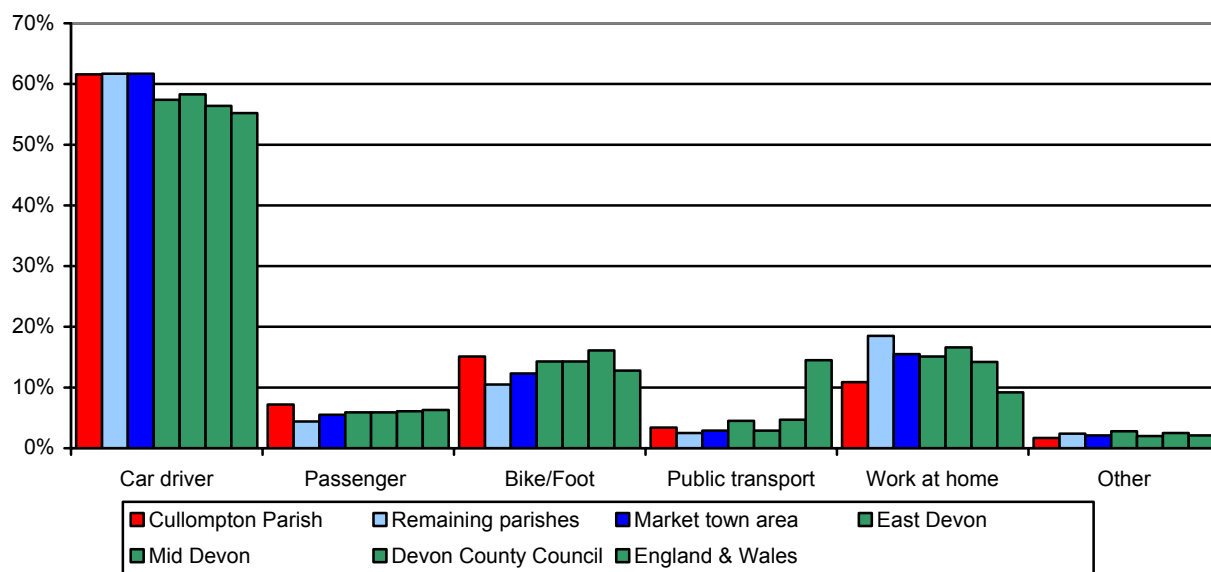

Area	All households	Households with:				
		No car	One car	Two cars	Three cars	Four or more cars
Cullompton parish	3,099	17.0%	47.7%	28.5%	5.0%	1.8%

The data below relating to accessibility by public transport are based on a best fit of Lower Super Output Areas (LSOAs).

Accessibility by public transport (2005)

Area	Number of households	Percentage of households that can access:		
		Acute hospital within 60 minutes	GP within 30 minutes	Shops within 30 minutes
Cullompton area	3,558	87.1%	85.8%	88.7%
Remaining area	6,642	62.4%	75.6%	64.2%
Market town area	10,200	71.0%	79.2%	72.7%
East Devon	54,998	66.1%	90.0%	88.3%
Mid Devon	28,903	60.8%	81.2%	75.9%
Devon County Council	298,578	66.7%	86.6%	85.2%
England	17,436,116	82.8%	95.2%	94.4%

Source: Department for Transport

Note: Acute hospitals are establishments which provide at least minimal medical, surgical or obstetrical services for inpatient treatment and/or care, and which provide round-the-clock comprehensive qualified nursing service as well as other necessary professional services. Most patients require a relatively short stay.

The Environment – Landscape

Main Issues

In 2002 Devon County Council undertook and published a landscape appraisal of the county which included a landscape character assessment. The result of this assessment was the division of the County into 32 Landscape Character Zones. The Cullompton market town area contains two Landscape Character Zones.

Landscape Character

Landscape character is defined as a distinct and recognisable pattern of elements that occur consistently in a particular type of landscape. Character makes each part of the landscape distinct, and gives each its particular sense of place.

Landscape character has an important role to play in that it informs the Devon County Structure Plan's fundamental landscape policy (CO1), requiring that development should be informed by and sympathetic to the landscape character of the area.

In 2002 Devon County Council undertook and published a landscape appraisal of the County which included a landscape character assessment. The result of this assessment was the division of the County into 32 Landscape Character Zones (LCZs), each with their own description and distinctive key characteristic features. The Cullompton market town area contains parts of two of these LCZs. Some of the key characteristics are outlined below.

Greensand Ridges

Location - The zone occupies two separate areas in the far south east corner of the County, the two parts being separated by the Axe Valley. The larger, more westerly area stretches from the Somerset boundary in the north to the English Channel coast in the south, bounded on the west by a line between Budleigh Salterton, Ottery St Mary, Honiton and Culmstock and on the east by the Axe Valley. The smaller, eastern area abuts the Dorset boundary and covers an area bounded by Lyme Regis and Axminster but excluding the coast. The western element of this LCZ covers the eastern part of the market town area.

Designations - The whole of this zone within the market town area is covered by the national designation of the Blackdown Hills Area of Outstanding Natural Beauty (AONB).

Key Characteristic Features

- Long greensand ridges including heath and forestry, beech hedges and avenues.
- Plateau landscape on ridge tops which includes common land, parliamentary enclosures, airfields and communications structures.
- Steep valleys between ridges enclosing a varied farming landscape, with woodland, hedgerow trees and springline flushes.
- Historic farm buildings utilising local materials.
- Springline settlements.

Mid Devon Farming Belt

Location - This zone occupies the lowland heart of Devon. It stretches from the Blackdown Hills in the east to the valley of the River Okement, north of Okehampton, in the west. To the north the zone wraps itself around the middle Exe Valley. It skirts the northern edge of Exeter and includes the Exeter – Honiton corridor as well as the historic routeways to the rest of the country between Exeter and the Somerset border near Wellington. This LCZ covers the western part of the market town area.

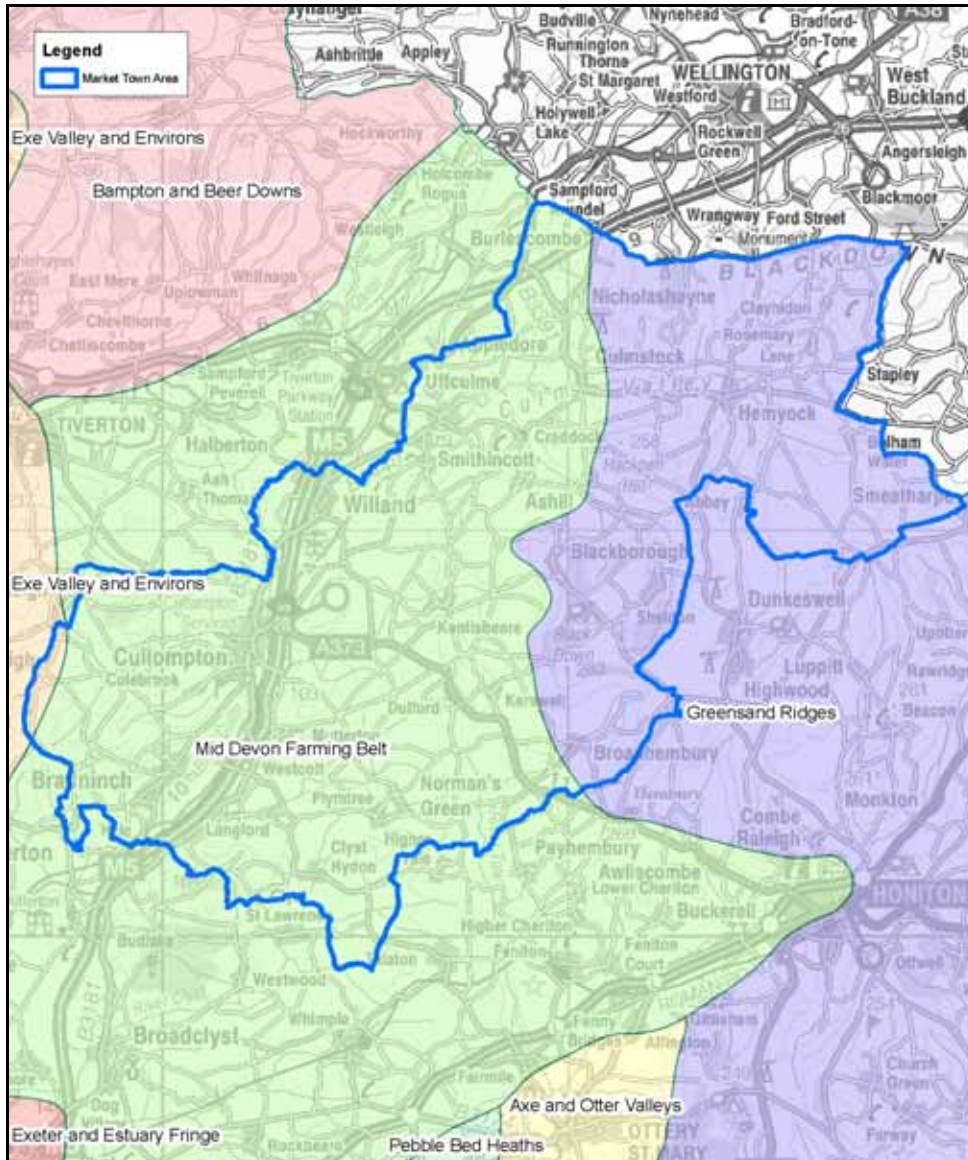

Designations - None of this zone is subject to any landscape designation.

Key Characteristics Features

- Flat or rolling mixed farmland with distinctive red soils.
- Relatively few woodlands, meaning hedgerow trees are an important landscape element.
- Major road and rail corridors: also the route of transmission lines.
- Heavily settled, by Devon standards, with many villages and scattered farms and a number of large towns.

- Cob and thatch buildings.

The Environment – Wildlife and Geology

Summary

The last 60 years have seen many dramatic changes within the English countryside, with increasing urbanisation and shifting patterns of agriculture. Devon has fared better than most, however, being protected by its remoteness and undulating terrain.

There remains much wildlife and geology to enjoy and conserve, and many opportunities exist throughout the County to enhance the natural environment. Landowners, industry and, of course, local communities all have the chance to contribute to the conservation of Devon's rich natural history.

The area around Cullompton is home to much wildlife. An agricultural landscape with many small woodlands and networks of hedgerows, collectively of considerable importance for our native flora and fauna, this area also includes a number of specific sites which are of national importance for their wildlife. This is particularly true to the east, where the influence of the Blackdown Hills comes into play. Here, extensive mosaics of wet and dry heath, mire and marshy grassland can still be found. Such habitats are now uncommon.

These habitats support many plants and animals and only a few key species can be listed here. For examples, amongst the characteristic flora of the heathlands are insectivorous plants such as round-leaved sundew and pale butterwort and an abundance of animal life is present including the pearl-bordered fritillary and diverse communities of breeding and wintering birds. Excitingly, white-clawed crayfish have recently been found in the River Culm, having not been recorded here for 16 years. This species is now only found on one other river system in Devon and is threatened by the presence of the more aggressive and plague carrying American signal crayfish.

Key sites

The table below contains information on the key features of some of the most important wildlife sites of this part of Devon. A map is also included to illustrate these.

Site name	Interest	Designation
Ashculm Turbary	Important wet heathland communities with a good fauna.	SSSI & Devon Wildlife Trust reserve
Blackdown & Sampford Commons	Extensive area of heathland, carr woodland and marshy grassland.	SSSI
Maiden Down	Lowland wet and dry heathland.	SSSI
Southey & Gotleigh Moors	Rich mosaic of valley mire, marshy grassland and carr woodland.	SSSI
Charwell Wetlands, Bradninch		LNR
Lickham Common	Wet heath, woodland and scrub.	Devon Wildlife Trust reserve

In addition to the table above, the Cullompton area has **62 County Wildlife Sites** and **County Geological Sites**. These mainly represent areas of broadleaved woodland, unimproved neutral and marshy grassland and springline mires.

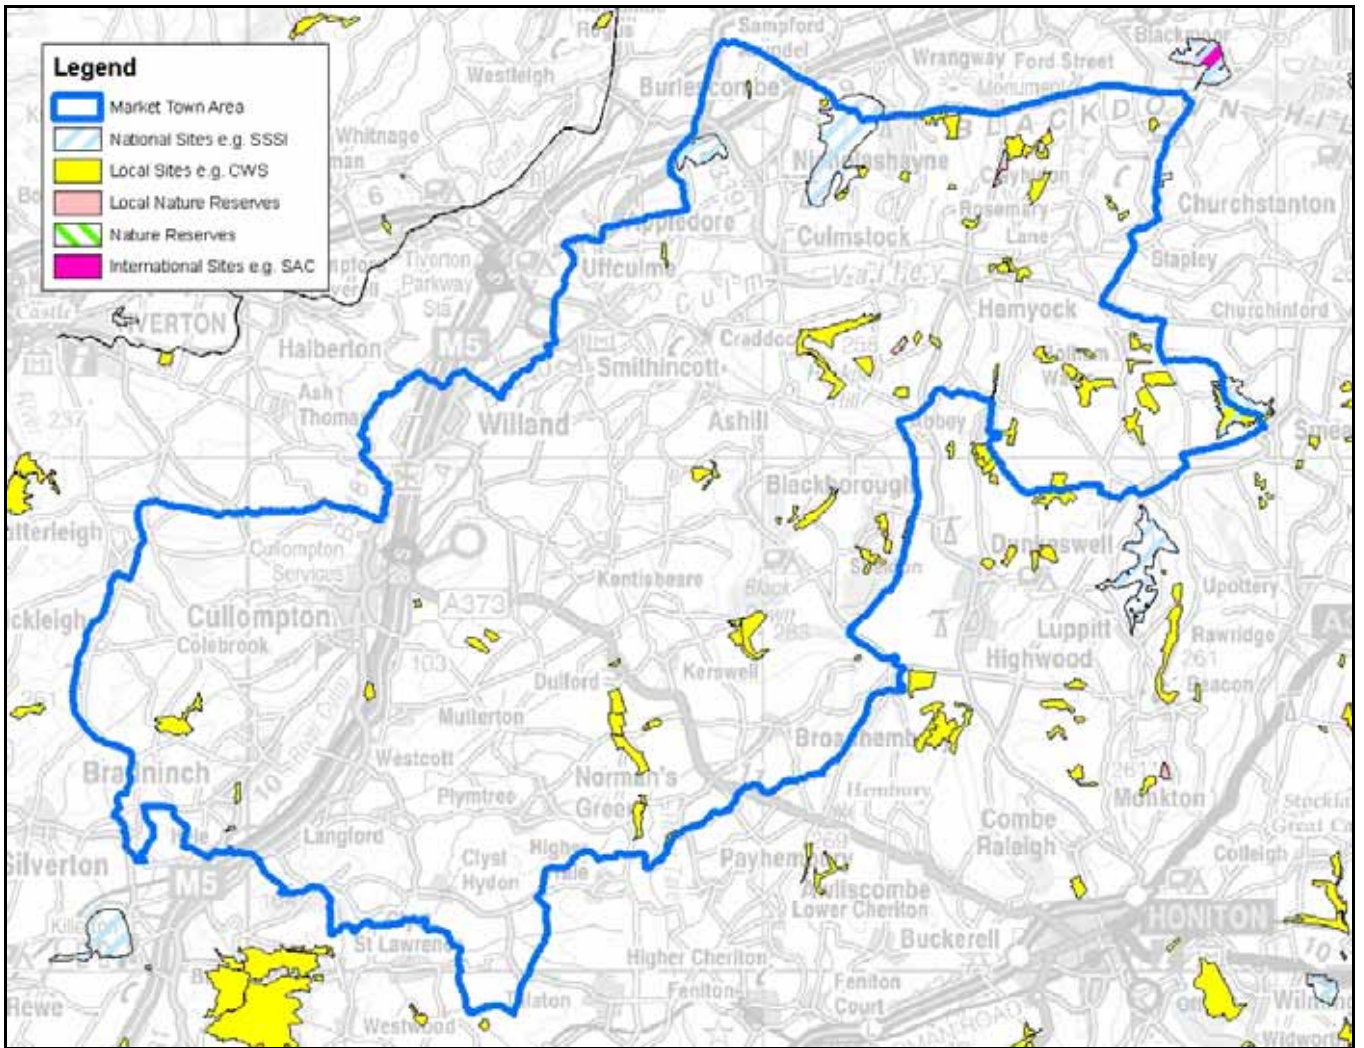

Key:

Sites of Special Scientific Interest (SSSI): these sites are notified because of their national importance for wildlife or geological features (gSSSI, above). SSSI is a statutory designation with legal implications. SSSI status does not confer any right of access to the public.

Local Nature Reserves (LNR): these are places with local wildlife or geological interest which offer good opportunities for learning about nature or simply enjoying it. LNR is a statutory designation made by local authorities.

County Wildlife Sites (CWS): these are sites of county importance for wildlife. CWS is not a statutory designation and does not have any legal status, though CWSs are usually included in district planning documents. CWS recognition places no formal obligation on the landowner, but may increase eligibility for land management grants. There are also County Geological Sites of a similar standing.
