

This profile has been produced in partnership across health & social care and offers an overview of the key demographic, lifestyle factors that may help understand the important areas affecting health and well-being in this Devon Town community. By bringing together a range of information across health and social care we can gain a better understanding of where there are high areas of demand on services but also where there is potentially unmet need.

This profile has been created to help stimulate discussion, not provide answers.

Introduction

All feedback and any questions on the information found within this profile are gratefully received. This profile will be most effective when used in conjunction with consultation and engagement with service users, carers and health and social care staff. Some of the questions you may wish to consider are:

- 1) Do you recognise the community described within the profile?
- 2) Is there any key information missing about health and social care need in the population?
- 3) Can any priority areas be identified from the story of this local area?

Please contact d-pc.strategicreview@nhs.net with any comments or questions you may have.

The pages that follow describe the key features of interest and raise some general questions and issues for further debate. The detail is presented in terms of comparison with the Devon average** and three terms are regularly used:

- Over-represented: This means there is more of a particular indicator for this Devon Town or locality when compared with the Devon average. (16% or more above the mean)
- Average: This means the indicator for this Devon Town is comparable with the overall Devon level
- Under-represented: This means there is less of a particular indicator for this Devon Town or locality when compared with the Devon average (16% or more below the mean)

***It is assumed the data values within each indicator are normally distributed. One standard deviation away from the mean has been applied to indicate over or under representation.*

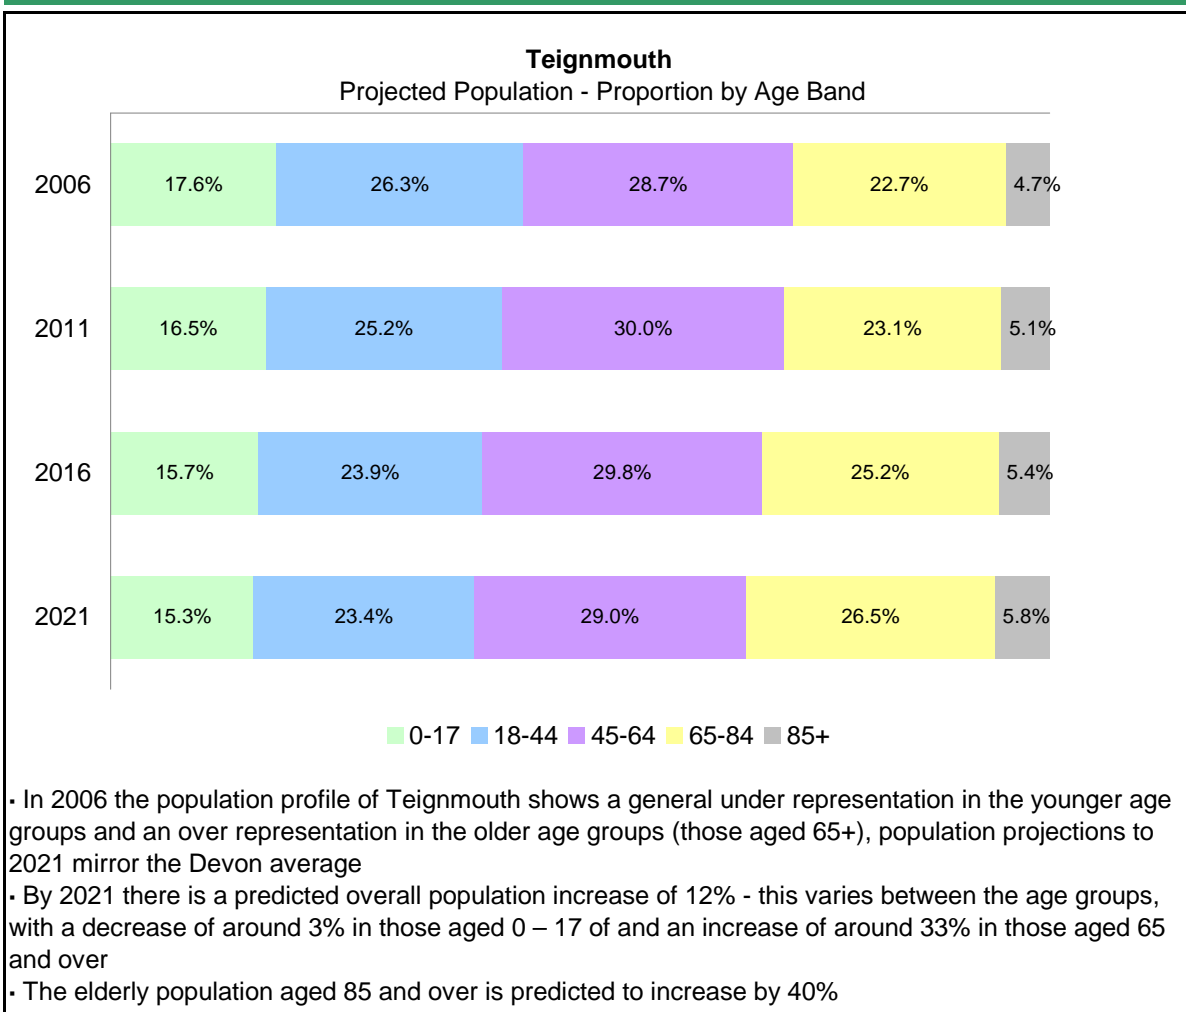

*The date of this profile refers to the year in which the information has been collated and analysed. The period the information refers to varies, i.e. Census 2001 data, financial Year 06/07 health activity etc and this should be taken into consideration when interpreting this profile.

It is important to note that over or under representation does not mean bad or good in this context, it merely expresses difference. For example, being under represented when compared to Devon in prevalence of a particular disease is a positive feature but being under represented in school attendance is a more negative one. It is important therefore that this document is read carefully and over and under representation are not confused with making judgements of good or bad.

A glossary of terms and full list of information sources used within these profiles is available upon request by contacting d-pc.strategicreview@nhs.net

What do we know about Teignmouth? (When compared to the Devon average)

Population Profile

Areas of Interest

- Over representation in the number of lone pensioner households; the highest rate in Teignbridge
- Over representation in those residents who are living in privately rented accommodation; the second highest rate in Devon
- Under representation in GCSE pass rates; the lowest rate of any Devon Town
- Attainment at Primary School age appears in line with the Devon average for Maths and English, but is under represented for Key Stage 2 – Level 4+ in Science
- Over representation in authorised absence rates from school; the highest rate in Teignbridge
- Under representation in the total attendance rate at school; the second lowest rate of any Devon Town

What do we know about Teignmouth? (When compared to the Devon average)

Indices of Multiple Deprivation - Index of Multiple Deprivation - overall index of the seven main sub-domains (listed below)

Income - Measure of persons on low incomes or dependent on state benefits

Employment - Measure of persons of working-age who are involuntarily excluded from labour market

Health - Measure of premature death, illness, hospital admissions and mental health prescribing

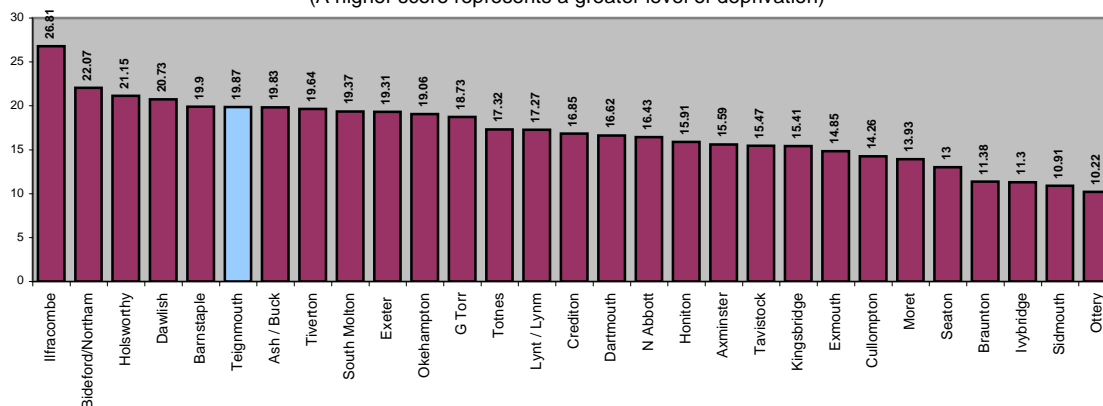

Education - Measure of educational attainment in children and skills and qualifications of adults

Barriers - Measure of distance to community facilities (GP, school etc.) and housing availability

Crime - Measure of recorded crime (burglary, theft, criminal damage and violence)

Living Env - Measure of indoor (quality of housing) and outdoor (RTAs and air quality) environments

Indices of Deprivation 2007 - Average IMD Scores by Devon Town
(A higher score represents a greater level of deprivation)

The Indices of Deprivation are reported on a small geography called Lower Super Output Areas (LSOA). These have been aggregated up to the Devon Town geography to allow for comparison between areas within Devon. The result of this is that the average score at a Devon Town level may mask neighbourhoods that the indices suggest are the most / least deprived.

Teignmouth has 12 LSOA's, of which 1 is in the most deprived quintile of LSOA's nationally and none are in the least deprived quintile.

Health and Social Care

HEALTH

- Over represented in people who feel that their health is generally poor; the second highest rate of any Devon Town
- GP (QoF) registers show over representation in Hypertension, COPD, CHD, Cancer and Atrial Fibrillation – with the highest proportion of people registered with Hypertension, CHD and Atrial Fibrillation in Teignbridge
- Age standardised death rates are generally in line with the Devon average. The exceptions are an under representation in Male death rates (lowest in Teignbridge) and Circulatory Disease (lowest in Teignbridge) and an over representation in alcohol related deaths (second highest of any Devon Town)
- Over representation in the percentage of population that smokes
- The Teignbridge population is:
 - Over represented in A&E attendances; the highest rate in Teignbridge and the second highest rate of any Devon Town
 - Over represented in new Outpatient appointments; the highest rate of any Devon Town. This predominantly relates to community hospital activity
 - Over represented in follow-up Outpatient appointments in both community and acute hospitals with the highest overall rate of follow-up appointments of any Devon Town
 - Second lowest DNA (did not attend) rate for new appointments in Teignbridge, but highest for follow-ups appointments
 - Under represented in both Elective admissions and Non-Elective admissions into hospital
 - Over represented in Mother & Baby admissions into acute hospitals

The chart above displays rates of self-report limiting long-term illness from the 2001 Census adjusted for age. A value of 100 represented by the line in the chart is the England & Wales average, and the bars represent rates for Devon Towns. This reveals that Teignmouth is in line with the national average, but above the Devon average.

SOCIAL CARE - Children’s & Young Persons (CYPS) and Adult & Community Services (ACS)

- Over representation of referrals to CYPS Social Care
- Over representation of referrals to Education Welfare Officer from 1st September 2006 and to Education Psychology
- Under representation of children in care for at least 12 months who had a health assessment in 2006/07
- Under representation of children known to Joint Agency Teams (district based)
- Over representation referrals into ACS; the highest rate of any Devon Town
- Over representation in the percentage of referrals from family / friends / neighbour and under represented in referrals from LA Housing / Other departments; the lowest rate of any Devon Town
- The Teignmouth population is:
 - Over represented in the rate of the population (aged 18+) receiving Personal care; the highest rate in Teignbridge
 - Over represented in the rate of the population (aged 18+) receiving care in a Residential home; the highest rate of any Devon Town
 - Under representation in the rate of the population (aged 18+) receiving care in a Nursing home
