Risk Log

Project Title: **HPE98494A CIF Scheme Teignbridge - Newton Abbot Infrastructure Package**
 Project Manager: **Tim Obee**

Version: **08/05/2009**

The purpose of the Risk Log is to provide a database of information about project risks (defined as events that have yet to happen that would affect the outcome of the project), their severity, measures to be taken and status. It is important to carefully consider the probability of a risk occurring, and the potential impact of the risk on the project.
