

## **How to use the Interactive Validation e-Document**

The 'Validation Requirements for Planning Applications to Devon County Council' is an interactive PDF document.

We recommend that you have the previous view icon in Adobe Reader available. If this is not showing in the tool bar, it can be found by clicking in tools/ customise toolbars and ensuring that previous view is ticked in the page navigation toolbar.

The e-document consists of a series of lists detailing national and local lists followed by notes. For ease of access, page 3 contains a list of different applications which can be found by clicking on the relevant application type. This will take you to the start of the relevant list.

National requirements will always apply but not all applications need all the Local list statements. You must check the thresholds for your application. These are in the second column.

There are notes included which explain what we expect you to submit in each case. Just click on each heading (first column), to find the notes for each section. The notes and tables sometimes contain web links to other guidance to help you assess the information we need.
